

## Instructions

# Quick Start Tutorial for TRILUTION® LH Software Version 3.0

## Part Number ETR210630R30

Let Gilson's Quick Start Tutorial assist you with learning and using TRILUTION LH Software. The enclosed CD is a self-contained beginner's tutorial, demonstrating how to create methods in TRILUTION LH Software and run samples for a simple Solid Phase Extraction application using the Gilson GX-271 ASPEC™.

The CD will automatically load a Quick Start Tutorial main menu with several TRILUTION LH Software tutorials and access to two additional resources to assist you in getting started. The tutorials can be viewed in any order by clicking the Play button from the main menu. Basic users may want to start with the 'Running Samples' tutorials, while users responsible for Method building may want to start at the beginning to learn from each tutorial. Each tutorial loads in a separate window through your web browser using Adobe Flash (see specifications on last page). Maximize the screen by pressing F11 on your computer keyboard (or View/Full Screen from your browser) to play the tutorials in full screen mode.

trilution® lh

## Instructions for Getting Started

- 1 Disable pop-ups from your browser (Tools/Pop-up Blocker). Select Turn Off Pop-up Blocker.
- 2 Insert the CD. The tutorial will automatically start and will display the main menu page. (If your computer does not automatically start the CD, please run the .EXE file on the CD.)
- 3 Click on a topic to view a tutorial.
- 4 If you see a security message from Adobe Flash Player, click **OK**. This is a message only, and it is not required to have internet connection to view the tutorials.
- 5 Press F11 to view tutorials in full screen with the resolution mentioned below for the tutorial to fit the window. Adjust your screen as necessary using the corners to reduce or enlarge.
